

Crime is rising faster than ever before, and criminals are becoming more brazen. A bold security solution is required to keep clients and their assets safe.

24/7 Security Services provides this solution with our Rapid Intervention Unit.

RAPID

Rapid Action Protection & Intervention Deployment

The 24/7 Security Rapid Intervention Unit was conceptualised and launched in response to Gauteng's extraordinary crime wave. Equipped with the latest technology and manned by highly trained officers, the Unit offers rapid response to the following high-risk scenarios:

Public Visibility Patrols

Visibility patrols are a key element of comprehensive security strategies. It is a highly effective crime deterrent and establishes a strong security presence. It allows officers to familiarise themselves with areas and enables them to identify abnormal situations and behaviour immediately. In addition, it ensures potential wrong-doers become hesitant about committing crimes in the patrolled areas.

Perimeter Patrols

Regular perimeter patrols are essential for properties based in high-risk areas and where criminal activity can go unnoticed due to expansive property perimeters. Patrols ensure officers identify anything suspicious linked to possible or planned breaches. Visible patrolling also serves as a warning to criminals who may be scouting the areas.

Close Protection/Evacuation

During unrest, protest action and other high-risk scenarios, the safety and security of staff is a priority. The Rapid Intervention Unit is geared to ensure the evacuation of staff from locations that are under threat. The vehicle can accommodate several people, and the officers are trained to manage high-risk scenarios fast and efficiently. A comprehensive range of Business Escort Services are available in the greater Joburg area.

Protest Action

Protest Action can quickly escalate to violent situations where mobs target people and properties. The 24/7 Security Rapid Intervention Unit is geared to respond to protest action in a structured and effective manner. Our officers are equipped with the necessary riot gear and are trained to manage potentially volatile scenarios. The 24/7 Security K9 Unit is an essential addition to our protest action intervention strategies.

Infrastructure Protection

Solar installations and other energy resources are at risk of vandalism and theft. Infrastructure protection has become essential with the escalation of crime and extended load shedding. Organised crime syndicates and opportunistic criminals threaten cell phone towers, sub-stations, water reservoirs and other essential services. The 24/7 Security Rapid Intervention Unit provides infrastructure protection to ensure the safety of valuable resources.

Special Armed Services

The 24/7 Security Rapid Intervention Unit collaborates with several of our specialised units. 24/7 Security Specialised Armed Services focus on vehicle escorts – specifically for businesses transporting route-to-market goods. They also provide business stand-off services. This service provides resources to businesses during high-risk operating periods, such as opening and closing times.

Armoured Fleet

The 24/7 Security Services fleet includes state-of-the-art B6 bullet-proof vehicles to meet the growing demand for armoured vehicle escorts. The Armoured Fleet provides an additional layer of security protection for high-risk vehicle, business, and VIP escorts. The vehicles are available for ad hoc escorts, supported by the 24/7 Specialised Armed Services crew - a team of highly trained individuals and a hands-on, experienced management team. All operations are backed by sophisticated surveillance and tracking equipment. B6 protection refers to the level of protection that a vehicle has against rounds fired by rifles. The ballistic glass used for the windows protects against shots fired by assault rifles. The vehicles are un-marked for increased security.

The 24/7 Security Rapid Intervention Unit can be contracted as an ad-hoc or retainer service - short and long-term contracts are available.
