

## Are You Ready for the Easter Holiday?

Whether you are leaving home for a few hours or for a few days, ensure that your security arrangements are in place:

- 1. Gate and Perimeter:** Ensure all gates lock properly and the perimeter is intact with no damage or weak points.
- 2. Electric Fence:** Test the fence to confirm it is live and free of faults or vegetation interference.
- 3. Perimeter Beams:** Check that beams are aligned, clean and triggering effectively.
- 4. Outdoor Lights:** Test all outdoor lights, replace faulty globes, or adjust timers and sensors.
- 5. CCTV Cameras:** Make sure cameras are recording, lenses are clean and remote viewing is functioning optimally.
- 6. Alarms:** Arm the system and run a full test to confirm all zones and sensors are working correctly.
- 7. Panic Buttons:** Test panic buttons to ensure they trigger correctly and are accessible to anyone staying behind.
- 8. Back-up Batteries:** Check battery health and confirm they hold charge long enough for outages.
- 9. Update Keyholder Details:** Confirm your keyholder list is up to date with correct phone numbers and availability.
- 10. Smoke/Fire Detector:** Test each detector and replace batteries where needed.
- 11. Water Leak Detector:** Confirm detectors are powered and functioning, especially near geysers and plumbing points.
- 12. CO<sub>2</sub> Detector:** Test the detector and ensure ventilation systems are operating correctly.
